Hows this..

The U.S. Environmental Protection Agency has approved the final cleanup plan for contaminated material at Allied Paper Landfill, a part of the Allied Paper/Portage Creek/Kalamazoo River Superfund site called Operable Unit 1. The cleanup will include consolidation and capping of material containing PCBs and other contaminants, and installation of a groundwater monitoring network.

Opportunities for future reuse and

redevelopment of the site will be an important focus during site cleanup.

The only issue I have is taking out that last sentence. That what everyone is wanting to know – if we are choosing the option that allows the site to be reused as we extensively discussed with the public last year. If we take it out – some could interpret that our final decision also does not include it.

Thoughts?

-Diane
